

To Whom It May Concern,

In these difficult times of manufacturing in the United States it would be criminal to allow complete speakers into the US with no duties. As it is I have to source some of my parts from China and have to pay duties on those parts. In essence you would be giving a blessing on overseas manufacturers and a curse on those still trying to manufacture in the U.S.A. I would encourage to take a stand against this as it is the crux of the downfall of our country by discouraging manufacturing in America. We (our government) needs to take a stand to bring manufacturing back to the U.S.A. and rewarding companies to do so. It will decrease unemployment, increase the tax base and help balance the trade deficit.

Sincerely,

David Chaffey
